DRONE IMAGE

WORKSHOP

Educational Workshop by Mandy Hutter

Mandy Hutter is doing research with the University of Guelph and has approached MFN to be a participant in using some amazing UAV systems technology as an engagement and communications tool for land experts that want to protect or restore land.

Mandy will be holding an Educational workshop for anyone that is interested in learning about Drones, how to use them, and techniques are used to assist in protecting our lands.

Sunday Feb, 9 2020 4PM-6PM Everyone Welcome

Cathy Yandea Lands & Resources

Mandy's research includes interviewing and reviewing info shared from representatives about their uses, needs (Values), and intentions for management of area of land

The information then guides the drone aerial surveys

This technology could assist in a Customized Engagement approach for forest Management plans

Come out and see what we have done so far

MATACHEWAN LOG BUILDING

Sunday Feb,9
4-6
