

Assay 3

POSTING #2020-101

Location: Macassa Site

Rotation: 5/5/4

Closing Date: September 21, 2020

If you thrive on success and team work in a team culture, Kirkland Lake Gold offers career opportunities on a global scale. We provide rewarding and challenging work that will help you grow your skills and your career.

Kirkland Lake Gold is committed to creating meaningful opportunities for our employees and we encourage everyone who works for us to contribute to their full potential. We are an equal opportunity employer and value diversity. We provide a safe work environment and seek to ensure all individuals are treated with respect and dignity, free from harassment, discrimination, bullying and retaliation. All employment is decided on the basis of qualifications, merit and business need. Disability-related accommodations during the application and selection process are available upon request.

Interested? We hope you are.

ABOUT THE OPPORTUNITY

Based at the Macassa Mine Site, we currently have an exciting opportunity for an **Assayer 3** to join our Assay team.

The Macassa Mine is a high-grade gold producer, with grade improving at depth, and a key valuation driver for Kirkland Lake Gold. Located in the Town of Kirkland Lake, Ontario, the Macassa Mine remains one of the highest gold grade mines in the world. Macassa commenced operations in 2002, and with the discovery of the South Mine Complex has been able to increase its level of production significantly over the past five years. The mine is located in an area with well-developed infrastructure, including a provincial highway, a railway system and a private airport. High-grade ore is processed at the Macassa Mill, which currently has available capacity and is located in close proximity to the mine.

The Assay 3 will be responsible for processing Mine Production and Exploration samples for grade control providing vital information in a timely method to assist in key decision making relating to mining/geology activity and reconciling samples entering and exiting the Mill Process.

RESPONSIBILITIES

Your responsibilities will include:

- Competency in Basic Mill Common Core & Alignment to Mill Classification Guideline (KLG Mill Operations Training Classification Guideline)
- Maintain records of the receipt and analysis of the samples, standards and reference material.
- Weigh, measure, record and mix samples.
- Organize work space to process samples from the mine following a chain of custody procedure.
- Crush and pulverize ore samples to the consistency required (-10 mesh). This is our Standard Operating Procedure.
- Perform routine inspections on machines and equipment to determine if any maintenance is required
- Responsible Quality Assurance (QA)
- Keep work areas clean to maintain a safe and clean working environment (Housekeeping)
- Prioritize work and follow Standard Operating Procedures and working safely

QUALIFICATIONS

Our ideal candidate has:

- Good oral and written communication skills
- An eye for detail and accuracy
- Capacity to learn
- Should have 2 years of experience to be considered competent
- Training on the job is provided but requires steady commitment
- Aptitude for prioritization of repetitive tasks (efficiency)

Does this sound like you? If so, we would love to hear from you.

WHAT'S IN IT FOR YOU?

Together, we are building a world-class gold mine and our success is determined by the hard work and dedication of our team. All of our team members are rewarded with a competitive benefits package and on-the-job perks, including:

- Competitive salary
- Group Benefit Package
- Training and learning opportunities

Should you be the successful candidate for this role, you will be contacted by a member of our Human Resources Department to schedule an interview.
