

Production Geologist/GIT POSTING #2020-103

Location: Macassa Site

Rotation: 5/2

Closing Date: September 21, 2020

If you thrive on success and team work in a team culture, Kirkland Lake Gold offers career opportunities on a global scale. We provide rewarding and challenging work that will help you grow your skills and your career.

Kirkland Lake Gold is committed to creating meaningful opportunities for our employees and we encourage everyone who works for us to contribute to their full potential. We are an equal opportunity employer and value diversity. We provide a safe work environment and seek to ensure all individuals are treated with respect and dignity, free from harassment, discrimination, bullying and retaliation. All employment is decided on the basis of qualifications, merit and business need. Disability-related accommodations during the application and selection process are available upon request.

Interested? We hope you are.

ABOUT THE OPPORTUNITY

Based at the Macassa Mine Site, we currently have an exciting opportunity for a **Production Geologist/GIT** to join our Production Geology team.

The Macassa Mine is a high-grade gold producer, with grade improving at depth, and a key valuation driver for Kirkland Lake Gold. Located in the Town of Kirkland Lake, Ontario, the Macassa Mine remains one of the highest gold grade mines in the world. Macassa commenced operations in 2002, and with the discovery of the South Mine Complex has been able to increase its level of production significantly over the past five years. The mine is located in an area with well-developed infrastructure, including a provincial highway, a railway system and a private airport. High-grade ore is processed at the Macassa Mill, which currently has available capacity and is located in close proximity to the mine.

The **Production Geologist/GIT** will be responsible to collect, collate and communicate accurate underground geological data to ensure that the operation efficiently extracts the orebody whilst ensuring adherence to all statutory requirements and Company Safety, Health and Environmental standards and procedures.

RESPONSIBILITIES

Your responsibilities will include:

- Diamond drill logging
- Maintain continual underground grade control mapping and sampling
- Data entry of geological information
- Maximize grade and minimize dilution through effective geological control
- Maintain high levels of communication between geological personnel and the contract work force
- Maintain daily, weekly and monthly reporting of production and reconciliation data
- Co-ordinate all geological, grade control and drilling activities in the underground operation, ensuring best practice techniques
- Produce technical reports based on resource definition and production findings
- Production grade control
- Other duties as applied from time to time

QUALIFICATIONS

Our ideal candidate has:

- Registered GIT or P.Geol
- 2 years plus in gold and underground
- Exceptional Computer skills
- Strong computer and data skills (Data Mine, Fusion, Auto Cad, DH Logger)
- Good written and verbal communication
- Self starter and ability to work unsupervised although strong team player
- High safety standards
- Exceptional time management skills
- Demonstrated ability to mentor subordinates

Does this sound like you? If so, we would love to hear from you.

WHAT'S IN IT FOR YOU?

Together, we are building a world-class gold mine and our success is determined by the hard work and dedication of our team. All of our team members are rewarded with a competitive benefits package and on-the-job perks, including:

- Competitive salary

- Group Benefit Package
- Training and learning opportunities

Should you be the successful candidate for this role, you will be contacted by a member of our Human Resources Department to schedule an interview.
