

Mill Co-Op Student (2021) POSTING #2020-105

Location: Macassa Site

Rotation: 5/2

Closing Date: September 30, 2020

If you thrive on success and team work in a team culture, Kirkland Lake Gold offers career opportunities on a global scale. We provide rewarding and challenging work that will help you grow your skills and your career.

Kirkland Lake Gold is committed to creating meaningful opportunities for our employees and we encourage everyone who works for us to contribute to their full potential. We are an equal opportunity employer and value diversity. We provide a safe work environment and seek to ensure all individuals are treated with respect and dignity, free from harassment, discrimination, bullying and retaliation. All employment is decided on the basis of qualifications, merit and business need. Disability-related accommodations during the application and selection process are available upon request.

Interested? We hope you are.

ABOUT THE OPPORTUNITY

Based at the Macassa Mine Site, we currently have an exciting opportunity for a **Mill Co-Op Student** to join our Mill Operations team.

The Macassa Mine is a high-grade gold producer, with grade improving at depth, and a key valuation driver for Kirkland Lake Gold. Located in the Town of Kirkland Lake, Ontario, the Macassa Mine remains one of the highest gold grade mines in the world. Macassa commenced operations in 2002, and with the discovery of the South Mine Complex has been able to increase its level of production significantly over the past five years. The mine is located in an area with well-developed infrastructure, including a provincial highway, a railway system and a private airport. High-grade ore is processed at the Macassa Mill, which currently has available capacity and is located in close proximity to the mine.

The **Mill Co-Op Student** will be responsible to provide support to metallurgical systems. The Co-Op Term will start January 2021 for a term of 8 or 12 months.

RESPONSIBILITIES

Your responsibilities will include:

- Process technical support for projects and metallurgical systems.
- Metallurgical sampling, analysis and accounting
- Completing lab tests (ie. Surveys, carbon activities, strip & leach profiles, settling tests, etc)
- Operate ETP circuit
- Conduct inventory (reagents)
- Perform other operational and technical tasks as assigned.
- Perform work to safely meet productivity expectations and schedules
- Housekeeping – keep work areas clean and free from hazards
- Communication – from and with others, recording accurate records on 5 point (Zero Hazard) card, aligning with daily tasks assigned
- Teamwork – complete set tasks and actively assist others to complete their tasks.

QUALIFICATIONS

Our ideal candidate has:

- Working towards a college or university degree, preferably in metallurgy, mineral processing and/or chemical engineering or science.
- Positive attitude, enthusiastic
- Ability to communicate well in English (both written and verbal)
- Computer skills (Microsoft Office)
- Able to adapt to changing situations

Does this sound like you? If so, we would love to hear from you.

WHAT'S IN IT FOR YOU?

Together, we are building a world-class gold mine and our success is determined by the hard work and dedication of our team. All of our team members are rewarded with a competitive benefits package and on-the-job perks, including:

- Competitive salary
- Training and learning opportunities

Should you be the successful candidate for this role, you will be contacted by a member of our Human Resources Department to schedule an interview.
