

Core Technician POSTING #2020-107

Location: Macassa Site

Rotation: 5/2

Closing Date: September 21, 2020

If you thrive on success and team work in a team culture, Kirkland Lake Gold offers career opportunities on a global scale. We provide rewarding and challenging work that will help you grow your skills and your career.

Kirkland Lake Gold is committed to creating meaningful opportunities for our employees and we encourage everyone who works for us to contribute to their full potential. We are an equal opportunity employer and value diversity. We provide a safe work environment and seek to ensure all individuals are treated with respect and dignity, free from harassment, discrimination, bullying and retaliation. All employment is decided on the basis of qualifications, merit and business need. Disability-related accommodations during the application and selection process are available upon request.

Interested? We hope you are.

ABOUT THE OPPORTUNITY

Based at the Macassa Mine Site, we currently have an exciting opportunity for a **Core Technician** to join our Exploration team.

The Macassa Mine is a high-grade gold producer, with grade improving at depth, and a key valuation driver for Kirkland Lake Gold. Located in the Town of Kirkland Lake, Ontario, the Macassa Mine remains one of the highest gold grade mines in the world. Macassa commenced operations in 2002, and with the discovery of the South Mine Complex has been able to increase its level of production significantly over the past five years. The mine is located in an area with well-developed infrastructure, including a provincial highway, a railway system and a private airport. High-grade ore is processed at the Macassa Mill, which currently has available capacity and is located in close proximity to the mine.

The **Core Technician** will be responsible to support the Exploration department by processing and sampling/cutting of diamond drill core.

RESPONSIBILITIES

Your responsibilities will include:

- Pickup drill core from headframe/drill site, open boxes and arrange in order,
- Checking then for block footage errors;
- Cut core as per training procedure, checking for QA/QC samples;
- Complete cutting log book/sheet and complete lab analysis form;
- Palletize/dump logged and sampled core boxes
- Maintain good housekeeping at all times, ensure proper PPE and tools are used for all tasks;
- Operate forklift as per proper training, moving core skids with core or samples and other materials;
- Take part in storing pulps and rejects as required;
- Assist geologists as required.

QUALIFICATIONS

Our ideal candidate has:

- Minimum Grade 12 Diploma or GED;
- Valid Driver's License;
- Previous experience involved with handling and cutting drill core in a mine or exploration setting;
- Good communication skills, literacy and numeracy skills;
- Self starter with the ability to manage repetitive tasks with minimal supervision;
- Physically fit with the ability to lift upwards of 55 lbs
- Proven commitment to safety, health and environmental best practices.

Does this sound like you? If so, we would love to hear from you.

WHAT'S IN IT FOR YOU?

Together, we are building a world-class gold mine and our success is determined by the hard work and dedication of our team. All of our team members are rewarded with a competitive benefits package and on-the-job perks, including:

- Competitive salary
- Group Benefit Package
- Training and learning opportunities

Should you be the successful candidate for this role, you will be contacted by a member of our Human Resources Department to schedule an interview.
