a subsidiary of

PAN AMERICAN
— SILVER —

About Us

Lake Shore Gold is located in Timmins, Ontario, a vibrant community of 45,000 residents that is a central hub for Northeastern Ontario. In Timmins, people can enjoy recreational activities such as camping, world class fishing, nature, and snowmobile trails. Direct flights to Toronto are available at the local airport via multiple carriers. There are many support networks in the community including the local Timmins and District Hospital, local sports leagues for children and adults (hockey, baseball, basketball, etc.), golf courses, both cross country and downhill ski resorts, a community pool, and many other community events that provide entertainment throughout the year (fairs, carnivals, concerts, etc.).

The Bell Creek Complex, located approximately 20 kilometers northeast of Timmins, Ontario, consists of an underground mine and processing facility. Mineralization is associated with the Porcupine-Destor fault system within the Abitibi greenstone belt, with ore mined by narrow vein longhole stoping methods. Ore is then transported to surface via a modern one thousand eighty metre deep shaft capable of forty-eight hundred tonnes per day.

The milling facility is a conventional free milling gold circuit consisting of crushing, SAG milling, leaching, CIL and CIP, stripping and refining. The mill currently processes up to 232 tonnes per hour from two separate mines and disposes of its tailings via conventional end of pipe discharge.

We are currently recruiting for: **Millwright for the Mill**
