
RYAN LAKE MINE REHAB PROJECT

MFN Log Building: May 7th
12pm lunch followed by presentation

The rehabilitation of the former Ryan Lake mine site is a priority for the Ministry of Mines. Rehabilitation of the site will improve public safety of the surrounding environment.

Join us to learn more about the geotechnical investigation, which will include drilling to determine long-term ground stability & the Designated Hazardous Material Survey, which will determine the hazards and location of the substances (buildings, equipment).

Share your questions, concerns and suggestions.
