

MFN Fish Stocking Environmental Assessment Training **Workshop**

Lands will be hosting an environmental fish stocking assessment training session at the log building on **July 14 starting at 10 am.**

The assessment will be happening all that week starting with 4 lakes in the community.

We are also looking for individuals that have an interest in learning this field and would like to go out in the boats to get hands on experience in what is involved with the environmental assessments activities we are doing.

You would receive an honorarium for your participation in the environmental assessment's activity studies.

This would be a great opportunity to earn some extra spending money while you receive sampling techniques and protocols of an environmental assessment and receive training that may be useful for career opportunities if you choose to venture into the environmental monitoring field.

Please contact Cathy Yandea by email landsresources@mfnrez.ca.

Or come to the workshop on the July 14th 10am!
