

ALAMOS GOLD INC.
YOUNG-DAVIDSON

Job Opportunity

Alamos is currently recruiting the following position to join our team at the Young-Davidson Mine in Matachewan, Ontario. The mine is located approximately 60 km west of Kirkland Lake.

Senior Core Technician

Alamos Gold Inc. Young-Davidson Mine, located in Matachewan, Ontario, approximately 60 km west of Kirkland Lake is hiring a Project Geologist at Young-Davidson. Young Davidson mine is among one of Canada's largest Underground Gold Mines with growing production and a large mineral reserve base. More information on Alamos Gold Inc. and the Young-Davidson Mine can be found on our website at www.alamosgold.com

Date Posted: March 25, 2021

Closing Date:

Until Filled

Reporting to the Senior Exploration Geologist, the Senior Core Technician will work alongside, and supervise, contract geological technicians and local workers to support regional exploration activities. You will collaborate with geologists on site to prioritize tasks and ensure they are carried out in a safe and efficient manner to meet exploration objectives.

Primary Responsibilities:

The role is to carry out and, more importantly, to train, organize and supervise others in carrying out the tasks listed below:

- Drill core management – checking run markers, labelling and racking core boxes
- Core orientation – docking oriented core, marking orientation and cut lines
- Core photography
- Magnetic susceptibility, specific gravity (SG) and RQD data measurement and data entry
- Moving core to permanent storage and bringing core in for relogging
- Core cutting
- Maintaining the inventory of QA/QC standards and blanks
- Preparing documentation for sample shipments, packing the samples and scheduling the shipments
- Organizing historic pulp and reject storage and creating an inventory
- Maintaining core storage maps and inventory lists
- Daily pre and post operational checks of equipment; truck, skid-steer, fire extinguishers, etc.
- Light equipment maintenance and record keeping (e.g. pumps, chainsaws, ATVs)
- Performing drill site inspections; prior, during and post drilling with a focus on safety and environmental regulations
- Supervising drillers performing down hole gyro surveys
- Supervising contract workers clearing drill pads and trails
- Supervising mechanical trenching and channel sampling
- Team player with a focus on health and safety

Qualifications and Experience:

- Self-motivated, and possesses leadership and mentoring abilities.
- Demonstrated commitment to safety, environment, and community.
- Able to work with a diverse team (geologists, students, casual workers, contract technicians and prospectors, contract drill crews)

ALAMOS GOLD INC.
YOUNG-DAVIDSON

- Geological Technician college diploma or bachelor's degree in Geology or Earth Science
- Minimum five years' experience in mineral exploration.
- Solid knowledge of mineral exploration geological technician roles (drill site surveys and inspections, core sampling/sawing, geotechnical measurements on core, drill core orientation, sample shipment QA/QC, mechanical trenching and channel sampling, equipment maintenance.
- Able to use MS Word, Excel and Outlook; and able to use geological software (e.g. Acquire) for sample and geotechnical data entry.
- Valid driver's license

Young Davidson offers competitive salaries with opportunities for both personal and professional advancement.

Qualified candidates are invited to visit our website, www.alamosgold.com and apply online under the careers' sections.
